

MR CHOMPS USER GUIDE

Compatible with these Spark R&D Binding Models: Ignition, Fuse, Blaze, Burner

Sizing		Inside Width	Weight (pair)
Regular	boards 26cm waist or less	13.8cm	370g (13oz)
Wide	boards over 26cm waist	14.8cm	379g (13.4oz)

Before use

Shims are shipped with your new crampons. If you are using Voile touring brackets, swap these with the Voile pin guides.

If you are using Chomps with our LT Brackets you do NOT need the shim underneath the bracket. You will need to swap out the long centering bar with the shorty bars that were included with your LT Pin System.

Mr. Chomps will then grab onto the underside of the touring pin as shown here.

For questions or concerns / 406.580.7674 or sales@sparkrandd.com

To install your crampons rotate the bindings forward and hook the crampon underneath the touring pin.

IMPORTANT: Make sure the crampon is fully engaged on the pin. Failure to do so can result in damaged or lost crampons.

When the skin track is steeper, flip up the heel rests on your board and Mr. Chomps. For maximum grip from your skis and crampons, stand up straight and keep weight on your heels.

Now, drop them in and enjoy 4-wheel drive for your splitboard!
