SPARK *CHRONICLES*

Based out of Bozeman, MT USA, Spark R&D is rider owned and operated – dedicated to pushing innovation in splitboarding since 2006.

The new PRO series bindings were a huge success with awards and accolades left and right. Built with our expertise and attention to detail, they truly are the lightest, strongest, highest performing splitboard bindings in the world. Our debut tip & tail clips, tech toe, updated crossbar clips, and solid board pucks continue to be a huge hit and are already on the verge of selling out mid-season.

It's been an epic year, but certainly not one without some challenges. We went big in 2018 – we learned a lot and are better because of it. As splitboarding grows in popularity worldwide, we continue to grow and learn with it. Our commitment to manufacturing quality products, our stoke for the splitboard community, and our drive to improve the backcountry experience has never been higher. We're moving forward with nothing but confidence and excitement.

For 2019 we are carrying over the product line and working within our walls to innovate our manufacturing processes. We have already added two new CNC machines, a brand new molding machine, more production employees, and have already started a pretty significant re-model. This will increase efficiency, keep tolerances tight, and boost our overall capacity. We have always obsessed over splitboard-specific details in our product line, and we will continue to bring you superior products, made right here, by us.

It's shaping up to be a great season.

Thanks for riding with us! 🍷

GOING SOLAR

We love splitboarding, and we know that reducing our carbon footprint is the best way to ensure that we get to continue to play in the snowy mountains. Manufacturing is energy-intensive, so using clean energy as part of our process is important to us. We installed our solar photovoltaic system in July 2018 at Spark HQ.

OnSite Energy installing our new panels

A bird's eye view

OUR SOLAR STATS:

- System Capacity: 50 kW
- Number of Panels: 166
- Annual Energy Production: 61,255 kWh
- Orientation: South facing with 15% tilt
- Energy Offset: ~25%

SPLITBOARD BINDINGS & TECHNOLOGY

Tesla T1

Binding System

T1 BINDING ANATOMY

- **Whammy Bar:** A single fatty wire with a side arm lever. You can switch easily from stowed, to low (12°), to high (18°) climbing positions and back again while touring.
- **T1 Heel Rest:** Catches the climbing wire in the 12° and 18° positions.
- **Snap Ramps & Side-Lock Touring Brackets:** T1 bindings slide sideways into offset touring brackets and are locked into place with our snap ramps. No pins, no cables, no fiddle factor.
- **Puck Compatibility:** Slide the bindings on and snap the ramp down to install. Flip the ramp up and slide the bindings off to remove. The most functional and intuitive way to attach your bindings to your board in ride mode.

U.S and international Patents

PILLOW LINE STRAPS

Our award-winning Pillow Line straps exceed the expectations of their epic feature list, not to mention, they are made at Spark R&D in the USA (even our molds were made in-house!).

- Super Light - They barely register on the scale.
- Durable - Can withstand the abuse of touring and riding in the backcountry.
- Waterproof - Will not take on water weight in warm conditions, or freeze when temperatures drop. Snow simply doesn't stick.
- Solid One Piece Construction - No glue, stitching, rivets, or foam to pack out over time.
- Comfortable - Thin, flexible pillow faces are the only parts that contact the boot. Thicker ribs and attachment points are held off the boot to maintain comfort. Soft and firm at the same time in a single piece.
- Stiff or Flexible - Arc ankle straps have a smaller footprint and a flex window for max agility, while Surge ankle straps have a wide, asymmetric footprint for incredible lateral support.
- Great Fit - All straps are ergonomically designed around 3D scans of popular snowboard boots.

Patented

RIP 'N' FLIP HIGHBACK

Rip 'N' Flip highbacks have an extensive list of rad features splitboarders can fully appreciate.

- Tool free micro-adjustable from 0° to 22° for complete customization of your forward lean angle.
- Flippin' FLAD toggles between your forward lean angle and -13° touring position for easy transitions.
- Unique re-curve design slopes gently outward at the heel for maximum comfort in tour mode.
- Shape modeled after 3D scans of popular snowboard boots so you know they have a great fit.
- Made with proprietary custom blended materials for improved strength and durability, while minimizing weight.
- Minimalist goals meet precision design, no padding is needed, shaving weight without sacrificing comfort or performance.
- Stiff where you need it toe-to-heel, yet torsionally flexible for improved mobility while riding. Stiffer for the Surge. Less stiff for the Arc.
- Large grab hole for security when unstrapping and billy goatig. Spark Strappy Strap ready with lateral slots built in.

Patented

Men's Arc Splitboard Binding

Lightweight with medium flex for long tours, epic overnights, trees and steeps. The Arc is our most popular splitboard binding.

Featuring

Lightweight and Surfy

- CNC machined baseplates with maximum cutouts shave weight, yet maintain strength and performance. Cutouts also conveniently allow for puck adjustment with bindings in place for precise stance placement.
- Features a medium flex version of the Rip 'N' Flip highback for a surfy ride down. Ideal for riders who prefer more mobility.
- Pillow Line straps are lightweight, durable, comfortable, waterproof, one-piece molded construction, and made 100% in-house. Ankle straps are smaller around the boot with a flex window for max agility while maintaining support. Toe straps are designed to be used as a toe cap, but also fit nicely as a traditional strap across the top of the boot.
- Features Tesla T1 System anatomy: built-in climbing wire, 2-position heel rest, snap ramps, and aluminum touring brackets.
- Whammy Bar climbing wire: a single fatty wire with a side arm lever for quick change high-to-low-to stowed.
- Ladders and adjusters produced in-house with unique thermoplastics that maintain flex over a wide temperature range.
- Incorporates Burton's time-tested bomber buckles.

øSizing	US Men's	EU Men's	Mondo Men's

Medium	8-10.5	40-43	25-27.5
Large	11+	43.5+	28+

M-Arc Weight: 1.37lb/ea (622g) - 2.74lb/pr (1244g)

SURGE

Men's Surge Splitboard Binding

The Surge is built for big days on big lines, and is preferred by our bigger, more aggressive riders.

Featuring

Stiff and Powerful

- CNC machined baseplates remain solid for max stiffness and durability.
- Features a stiffer version of the Rip 'N' Flip highback for riders who prefer maximum response.
- Pillow Line straps are lightweight, durable, comfortable, waterproof, one-piece molded construction, and made 100% in-house. Ankle straps are wide and asymmetrical around the boot for incredible all around support. Toe straps are designed to be used as a toe cap, but also fit nicely as a traditional strap across the top of the boot.
- Features Tesla T1 System anatomy: built-in climbing wire, 2-position heel rest, snap ramps, and aluminum touring brackets.
- Whammy Bar climbing wire: a single fatty wire with a side arm lever for quick change high-to-low-to stowed.
- Ladders and adjusters produced in-house with unique thermoplastics that maintain flex over a wide temperature range.
- Incorporates Burton's time-tested bomber buckles.

M-Surge Weight: 1.49lb/ea (676g) - 2.98lb/pr (1352g)

Women's Bindings

Arc & Surge

Women expect the same reliable, top-level performance in their splitboard bindings as men do. That's why we offer the Arc and Surge with all the same features as our Men's line, but sized specifically for Women's boots.

Featuring

- Shorter, narrower baseplates fit snug and comfortably, accommodating down to a size US 5 boot.
- Lower and more compact heel loops move the ankle strap mounting point down to hit the sweet spot over the boot while positioning the highbacks lower on the leg for a better calf fit.
- Molded ankle and toe straps have been engineered around popular Women's snowboard boots, so we know they are sized and shaped to fit just right.

Women's Arc & Surge Sizing

♀Sizing	US Wmn's	EU Wmn's	Mondo Wmn's

M/L	9-11	40-43.5	26-28

Plum

Black/Ice

WOMEN'S ARC

The Women's Arc has all the same great features of our standard Arc - max baseplate cutouts for weight savings, lower profile ankle strap, and a more flexible highback. The Arc is the perfect choice for the ladies who want a lightweight binding with softer features for comfort and max versatility, sized for her.

XS/S Arc Weight: 1.34lb/ea (606g)
2.67lb/pr (1212g)

WOMEN'S SURGE

The Women's Surge features all the same stiff and powerful components of our standard Surge – solid baseplate, wide supportive ankle straps, and a stiff highback. The Surge will be a favorite for the splitboardette looking for a tough binding to keep up with her, in a size that's just right.

XS/S Surge Weight: 1.42lb/ea (646g)
2.85lb/pr (1292g)

Black/Pink

PRO_{series}

The lightest, and highest performing splitboard bindings in the world. - made with incredible attention to detail and no compromises.

Our PRO binding series was unveiled just over a year ago and the response has been incredible. Made with extreme attention to detail, premium materials, and custom components, these bindings are designed for splitboarders who want the best of the best.

They are the culmination of our years in the forefront of splitboard binding technology and manufacturing. You can see our expertise in each component, and the thought put into these bindings in each material and area of design.

You'll notice the lightweight construction and ease of use on the skin track, and the high quality materials in the performance on the ride down.

Carbon reinforced nylon highbacks

Carbon highbacks are more responsive, lighter, and stiffer than our standard glass reinforced highbacks. Injection molding allows for more complex geometry and improved impact strength compared to other methods of carbon fiber construction.

Full Pebax[®] plastics in Pillow Line straps, ladders, & adjusters.

Pebax[®] is a premium material most often found in high-end ski boots as it provides consistent stiffness and improved toughness in cold temperatures. It's also 20% lighter than our standard material.

7075 aluminum heel loops

7075 Aluminum heel loops are thinner and lighter than our standard heel loops while maintaining the required strength.

Hollow pivot pins

Made with stainless steel and are hollowed out to be 33% lighter than standard pins.

1 Gram Counting

Weight savings add up by replacing stainless steel hardware with custom-made 7075-T6 aluminum hardware. Aluminum parts are 65% lighter than our standard stainless parts.

■ Perhaps the most custom splitboard binding-specific screws you'll ever see are our aluminum heel loop screws. The custom screw head shape is optimized with more than double the drive depth of a standard button head screw to avoid stripping. We added an unthreaded shoulder to improve the connection with the heel loop. To top it off, we add a custom loctite patch. If these screws come out, it's because you take them out.

We re-created these screws and nuts from our standard stainless steel versions:

- Aluminum forward lean nuts
- Aluminum forward lean screws
- Aluminum ankle strap t-nuts

We switched these screws to aluminum and also produced them with a hex drive instead of phillips head, which are less likely to strip:

- Aluminum heel rest screws
- Aluminum Tesla bracket screws
- Aluminum ankle strap screws

PRO series

The lightest and highest performing bindings in the world - made with incredible attention to detail and no compromises.

Pro bindings feature all the same great assets as our standard Arc and Surge bindings tuned up with premium materials and custom versions: Carbon reinforced nylon highbacks, full Pebax® plastics, 7075 aluminum heel loops, hollow stainless steel pivot pins, and seven custom made screws and hardware pieces.

Pin Mount

Splitboard Binding & Accessories

The Blaze TR is Tour Ready, with LT brackets and dual height wires, so all you need in addition is pucks, a splitboard, and motivation to get out there.

The Blaze is the longest running splitboard binding on the market. It's designed for the all-around adventurer looking for straightforward tech and high performance at a pricepoint that's hard to beat. This original pin mount model is a great choice for new or casual splitboarders, or a good option for dealers wanting a low-cost demo program.

● Black

Patented

- Rip 'N' Flip highback in a nice medium flex for a surfy ride down.
- CNC machined baseplate with maximum cutouts to shave weight, yet maintain strength and performance.
- Pre-curved, 3D low profile ankle and toe straps use Burton's time tested and industry-leading fabrics and buckles made to our specifications.
- Ladders and adjusters produced in-house with unique thermoplastics that maintain flex over a wide temperature range.
- LT Touring Bracket is stiff, light, and slop free. Made from aluminum with pressed brass bushings for a lightweight and solid tour.
- Stainless steel pin attached via a cable. Pushes all the way through the binding and touring bracket and held in place by tucking the arm of the pin under the toe strap next to your boot to lock the binding in tour or ride mode.
- Dual height wires offer 12° and 18° angles for comfort on any skin track.

LT Touring Bracket

Stiff, light, and slop-free. Upgrade your brackets, deck out some old Blazes, or set up a second board. Compatible with Spark pin mount bindings. Comes with a pair of shorty bars for use with Mr. Chomps.

Weight: 2.15oz/pr (61g)

Pin Binding Dual Height Wire

Upgrade your single height wires, deck out some old Blazes, or set up a second board. Gives you 12° and 18° climbing angles for smooth skinning on the steepes. Compatible with Spark or Voile pin mount bindings.

Weight: 2.61oz/ea (74g) - 5.22oz/pr (148g)

Mr. Chomps Crampons

When the skin track gets icy and steep, drop in your Mr. Chomps – our first class crampon for pin mount bindings. Lean forward to easily position crampons under the touring pin and remove the same way. Pull up on the crampon riser to keep the full depth of teeth in the snow when using your climbing wires. Can be used in free or fixed mode depending on the terrain and snow surface. Comes standard with long centering bars attached for use with Voile touring brackets, and extra shorty bars to switch out for use with our LT bracket.

Weight: 6.49oz/ea (184g) - 12.98oz/pr (368g) - Regular

● Black

Sizing	Board Waist	Inside Width
Regular	25-26cm (most boards)	13.8cm
Wide	26cm or more	14.8cm

Stainless Steel Pins

For use with Spark pin mount bindings in either our LT or Voile touring brackets. A great addition to the spare parts kit. Sold as a pair.

Weight: 3.70oz/pr (105g)

Hardboot Bindings & Accessories

Dyno DH Hardboot Binding *Dyno DH*

The Dyno DH is our acclaimed hardboot specific splitboard binding. It is designed to fit a variety of touring boots from different brands and delivers high-end performance to the growing hardboot segment of splitboarders. All parts are designed and manufactured by us from start to finish for the all around precision that you can only get from a Spark made product.

Dyno DH bindings are for riding only. Carry them in your pack on the way up, while using your tech toes for touring. Then slide the Dynos on your pucks and lock into place with the snap ramps for the ride down.

- Extremely Lightweight - only 409 grams per binding
- Stainless steel toe and heel bails
- Toe clip is designed to fit low profile AT boots
- Efficient design saves weight while maintaining backcountry dependability
- Set screw has a 4mm hex drive, found in our Spark Tool
- Baseplate heel end is reinforced and extra sturdy to avoid bending from heavy use
- Features Tesla Snap Ramps for speedy, pinless transitions
- Puck compatible (Spark Canted Pucks recommended)

Weight: .90lb/ea (409g) - 1.80lb/pr (818g)

One Size ● Black/Blue

D Rex Crampons

Designed for our hardcore hardbooters, these crampons slide into tech toe claw mounts. Install and remove on the fly for utmost confidence in dicey conditions. Stack up the crampon riser blocks to keep the full depth of teeth in the snow when using heel risers. Comes in Regular and Wide widths. Compatible with Spark Tech Toe and Dynafit Speed Radical, Speed Turn, or Low Tech toe pieces.

Weight: 6.67oz/ea (189g) - 13.33oz/pr (378g) - Regular

● Black

Spark Tech Toes

A Spark original tech toe designed for the split-hardbooter. It's debut in 2018 was a testament to the innovative design and the growing hardboot community, with all units selling out before the season even began. With its integrated splitboard touring bracket hole pattern, this tech toe doesn't need an adapter, saving weight, unnecessary parts, and expense. It also has built-in claw mounts for the D Rex crampon. Couple with our Hardboot Dual Height Wires to be ready to tour. The Spark Tech Toe is intended for splitboard touring only.

Weight: 5.11 oz/ea (145g) - 10.22 oz/pair (290g) ● Black/Blue

Hardboot Dual Height Wires

Wires offer 12° and 18° angles for comfort on any skin track. Comes with a heel adapter that screws right into your splitboard inserts, and places your dual height wires right where they need to be, hitting the perfect spot on the heel of your hardboot.

Weight: 3.46oz/ea (98g) - 6.91oz/pr (196g)

● Black

Dynafit Toe Adapter Plates

These adapters allow you drill-free use of Dynafit Speed Radical, Speed Turn, or Low Tech Race toe pieces by utilizing the existing inserts in your splitboard. Couple with our Hardboot Dual Height Wires to be ready to tour.

Weight: 2.05oz/ea (58g) - 4.09oz/pr (116g)

● Black

SPLITBOARD GEAR & ACCESSORIES

Rider: Jean-Louis Saint Arneault
Photo: Guillaume Le Guillou

IBEX CRAMPONS

ibex Crampons

Ibex Crampons are 4WD for your splitboard. Lightweight aluminum construction for max strength and minimum weight. Installation and removal is effortless and can be done on the fly without unstrapping, by sliding the crampon sideways into and out of touring bracket claw mounts. Teeth are fully engaged when used with or without the dual position climbing wire for maximum security on dicey terrain. Our dual-width design features one crampon that is slightly wider than the other, allowing the crampons to nest together for easy handling and reduced packing space.

Weight: 5.93oz/ea (168g) – 11.85oz/pr (336g)

Sizes: Narrow, Regular, Wide

ibex PRO Crampons

If you want the best of the best, we made this for you. A 7075 aluminum crampon body is just as strong, but lighter and thinner than our standard Ibex. It slices through the snow even better with less drag, saving you valuable energy output on the skin track. All in all, the Ibex Pro crampon is 22% lighter than our standard Ibex - the lightest split crampon in the world. Its dual-width design features one crampon that is slightly wider than the other, allowing the crampons to nest together for easy handling and reduced packing space.

Weight: 4.59 oz/ea (130g) – 9.18 oz/pr (260g) - Regular

Sizes: Narrow, Regular, Wide

Both Ibex and Ibex Pro are compatible with all Tesla and T1 bindings including the Burton Hitchhiker.

Sizing	Board Waist	Nested Crampon Inside Width
Narrow	25cm or less	12.8cm
Regular	25-26cm (most boards)	13.8cm
Wide	26cm or more	14.8cm

Spark Solid Board Pucks

We have the quiver game dialed with our Solid Board Pucks, because let's face it, sometimes you're just not on your split. Great for solid board mountaineering, snowmo-boarding, trips where you are traveling with multiple boards, or days when you may see a mix of resort riding and splitting. You may have a quiver of boards, but you only need one set of bindings.

- Near-infinite adjustability, just like our Spark Pucks: +/- 1/4" (6.5mm) toe/heel centering adjustment in .08" (2.1mm) increments
- -12° to +30° angular adjustment in 3° increments, covering everyone from jibbers to trench diggers
- Stance width adjustable in .2 inch (5mm) increments
- Can be used with 4x2 insert and channel boards
- Lightweight
- Works with all puck compatible splitboard bindings

Weight: 10.09oz/pr (286g)

● Black
Patent Pending

Spark Solid Board Canted Pucks

Our canted version has all the same great features of our standard Spark Solid Board Pucks, only with 3° canting to reduce knee strain.

Weight: 11.5oz/pr (326g)

● Black
Patent Pending

Ambassador: Frankie Devlin
Photo: Colin Wiseman

Spark Pucks

Channel-like stance adjustability for splitboards built with inserts. Believe it. This breakthrough in design has riders beyond stoked, and has made Spark Pucks our most popular splitboard accessory.

- Oversize aluminum center disc overlaps binding channels for maximum strength and rigidity
- Bindings slide on soft nylon material for effortless transitions
- Near-infinite adjustability, for your perfect stance and placement: +/- 1/4" (6.5mm) toe/heel adjustment in .05" (1.3mm) increments
- +/- 30° range of angle adjustment in 3° increments
- Stance width adjustments in .17" (4.2mm) increments
- Works with all puck compatible splitboard bindings

Weight: 10.19oz/pr (289g)

● Black/Metal
Patented

Spark Canted Pucks

Our canted version has all the same great features as our Spark Pucks. With 3° canting to reduce strain, your knees will thank you.

Weight: 11.36oz/pr (322g) ● Black/Metal

Patented

You want your splitboard to ride like a solid board. We get it; so do we. The trick is getting your board to fit together perfectly, and Spark continues to seek perfection. Our clip designs feature sensible adjustability to get your board together seamlessly, regardless of variability or wear.

Team Rider: Byron Bagwell
Photo: Colin Wiseman

Spark Tip & Tail Clips

Our tip and tail clip design offers a custom fit to match the variability in any board. With five progressively tighter notches you can get your board as tight as you want. No need to freeze your fingers, this clip is effortlessly operated with your gloves on. Easily installed with a Spark tool and a screwdriver.

Weight: 0.56oz/pr (16g)

● Black

Patent Pending

Spark Crossbar Clips

Our creative design features a one-piece crossbar that extends from one set of bolts to the other for a stiff and gapless connection between board halves. The crossbar and lever rotate out of the way leaving nothing hanging over the edges to snag while you're touring or getting rad split skiing. Clamping tension is easily fine-tuned by turning a set screw, compensating for any wear or board variability. Spark Crossbar Clips are made from aluminum and brass in an elegant low profile design, with only two moving parts. As a bonus feature, they can be entirely set up with the M3 hex bit on your Spark tool.

Compatibility: for boards that are drilled through at the clip mounting points (you can see screw heads on the base of your board).

Weight: 2.89oz/pr (82g)

● Black

Patent Pending

Spark Top-Mount Crossbar Clips

These are the same design as our regular Spark Crossbar Clips, but with the necessary Top-Mount parts and hardware.

Compatibility: for boards that have inserts at the clip mounting points (you do not see any screw heads on the base of your board).

Weight: 2.89oz/pr (82g)

● Black/Metal

Patent Pending

Spark Skins

High traction skin material manufactured by G3 is the perfect combination of stick, slide, and grip. Equipped with our patented tailclips, our skins get you to the top with less effort and more style.

Spark Crossword Graphic

Weight: 0.83lb/ea (378g) - 1.67lb/pr (756g) - Medium

Small: 147-161cm / Medium: 159-175cm / Long: 172-186cm

Strappy Strap

Less fatigue equals more fun in the backcountry. The Strappy Strap is designed to slot through Spark R&D highbacks and wrap around the top of your boot to provide additional support and edging power while touring.

Weight: 1.83oz/ea (52g) - 3.67oz/pr (104g)

● Black

Zip Strip Kit

Designed to increase glide on flat or low angle approaches and rolling exits. Zip Strips will get you farther with each stride, making your splitboard tour more like a pair of cross country skis. Friction is reduced by covering excess skin fibers with a piece of slippery base material. Install or remove on the fly without unstrapping or removing your skins. Zip Strips roll up into a small package that easily fits in your pocket. Kit includes tip clips and modified tailclips. Available in a Spark Skin specific version and a Universal version to cover all splitboard skins.

Zip Strip Weight: 1.59oz/ea (45g) - 3.17oz/pr (90g)

Tailclip Kit

Tour with confidence, even backwards, knowing your skins are securely in place. Our Tailclips are a retrofit addition to any skins - all you need is a hammer and scissors to install. Asymmetric clips designed for splitboard shapes are easy to remove and secure, keeping skins tensioned parallel to length.

- 10cm of tool-free length adjustment to fit your whole quiver
- Kit includes stretchers, clips, rivets, and webbing extenders for those of you with extra long boards or extra short skins.

Weight: 0.81oz/ea (23g) - 1.62oz/pr (46g)

● Black ● Red

Patented

Verts

When skinning just isn't an option, post-holing shouldn't be either. Our collaboration with Verts offers you a split friendly climbing alternative - the first ever splitboard specific snowshoe.

- Slide your Spark binding directly onto the adapter, no need for a separate snowshoe binding
- Designed specifically for ascending steep slopes
Compact 18.75" x 8.5" (48cm x 22cm) footprint
- Toe forward design for fatigue-free front pointing
- High performance non-stick, super tough nylon

Weight: 1.21lb/ea (548g) - 2.41lb/pr (1095g)

TOURING TOOLS

T1 Riser Kit

Big Feet? We've got you covered. Our riser kit screws in underneath touring brackets and heel rests to raise you up. This increases the binding rotation angle while touring to prevent toe strike and increase stride length.

- Compatible with all Tesla T1 bindings (Men's and Women's Arc & Surge including Pro models, as well as the T1 Burton Hitchhiker)

Weight: 5.43oz/pr (154g) ● Black

T1 Step Locker

The option to lock your heel while touring helps you better adapt to diversified terrain types where quick descents, side stepping, and skate-splitting become more effective means of backcountry travel. Our Step Lock design makes it easier than ever.

Weight: 1.5oz/ea (42g) - 3.0oz/pr (84g)

● Black

- Rotate lever to locked position, then step down to lock heel
 - Plastic lock bar grabs underneath the baseplate without wearing either piece
 - Heel stays locked until you rotate the lever to the unlocked position
 - Locker held securely in both locked and unlocked positions
 - Locker assembly screws in under heel rest
 - Forward releasable for added safety
 - Compatible with all Tesla T1 bindings (Men's and Women's Arc & Surge including Pro models, as well as the T1 Burton Hitchhiker)
- Patent Pending

Team Rider: Mike Handford and crew

BD-Compactor Poles

Sturdy, adjustable-length, aluminum Touring Series climbing poles ideal for splitboarding. Improved segment connection points are now more durable. Z-Pole functionality deploys in seconds, and folds down to an ultra-compact and packable size for the ride down. Offers 20cm of adjustment for all conditions.

Usable Length: Short: 41-48.8in (105-125cm)
Long: 44.9-52.7in (115-135cm)
Collapsed Length: Short & Long: 16.3in (41.5cm)
Weight: Short: 1.29lb/pr (588g) Long: 1.34lb/pr (608g)

BD-3 Piece Whippet Pole

Built for steep terrain that requires extra traction, the Whippet features a removable steel pick. Using the innovative BD ClickLock Dial, you can attach the pick to add a margin of safety for icy bootpacks and no-fall descents, and then remove it for shredding low-angle powder in the backcountry. With its three-section packability, the Whippet is stowable, making it ideal for splitboarding excursions. Features a 3-piece aluminum shaft, a grip insert for tour/ski mode, and FlickLock Pro adjustability. Sold individually.

Usable Length: 39-55" (100-140cm)
Collapsed Length: 30" (66cm)
Weight: 1.09lb/ea (497g)

Baseplate Padding

Reduce foot fatigue on long tours and increase insulation on arctic days with our Baseplate Padding Kit. This is an easy retrofit to make your Spark bindings feel a bit more cozy. Made of durable, grippy EVA foam. 3M peel and stick adhesive keeps pads firmly in place. Ideal for long days in the skin track, firm riding conditions, and cold feet.

Weight: 1.13oz/pr (32g) - Solid Size 3
 Gray

Pillow Line Straps

For Spark fans who already have bindings and just want to upgrade from their fabric straps, or switch from one model to another. We are offering Pillow Line strap sets à la carte so everyone can enjoy the weight savings, performance, and durability in this molded one-piece waterproof construction. Ankle straps come in Men's and Women's Arc & Surge models. Toe straps come unisex in just one model. All straps come complete with buckles, plastics, and necessary hardware.

Weight:
Pillow Line Complete Ankle: Arc: 8.40oz/pr (242g) / Surge 8.80oz/pr (252g) - M  Black
Pillow Line Complete Toe: 4.40oz/pr (126g) - M  Black
Patented

Rip 'N' Flip Highbacks

For Spark fans who already have bindings and want to upgrade their classic highback to our Rip 'N' Flip Highback. Comes à la carte in both the moderate flex Arc and the stiffer Surge models. Also a good option for splitboarders who have one model and want to try the other to find just the right flex. Compatible with Tesla, T1, Pin Mount, and Burton Hitchhiker bindings.

Weight:
Arc - 3.35oz/ea (95g) - 6.7oz/pr (190g)  Black
Surge 3.49oz/ea (99g) - 6.98oz/pr (198g)  Black

SPARES & HARDWARE

Backcountry Kit

Everything you need to keep a pow day from being cut short. Includes spare plastics, screws, and buckles.

Dealer Spare Parts Kit

All you need to service your entire Spark R&D fleet and your customers' spare parts requests.

Spark Tool

Your best friend in the backcountry, this tool has everything you need to adjust your splitboard and binding setup.

Whammy Bars

Impress your friends with your climbing bar deployment steeze. This retrofit climbing wire with a side arm lever replaces your non-whammy climbing wire for quick change high-to-low-to-stowed action. Use your touring pole to flip the Whammy Bar down for 12° then down again for 18°. Flip the bar back up to stow.

Weight: 1.48oz/pr (42g)

2nd Board Kit

Set up another splitboard to be tour-ready. Comes with screws, heel rests, and touring brackets. Pair this up with some Spark Pucks and your 2nd board is ready to go. Compatible with all Tesla T1 bindings (Men's and Women's Arc & Surge including Pro models, as well as the T1 Burton Hitchhiker)

Weight: 5.64oz/pr (160g)
